GETTING THE AIRCRAFT BACK IN THE AIR

AGX AOG

An air freight product bound by years of experience and premium expertise. Specializing on the shipment of time-sensitive and urgent commercial or critical aircraft parts anywhere in the world.

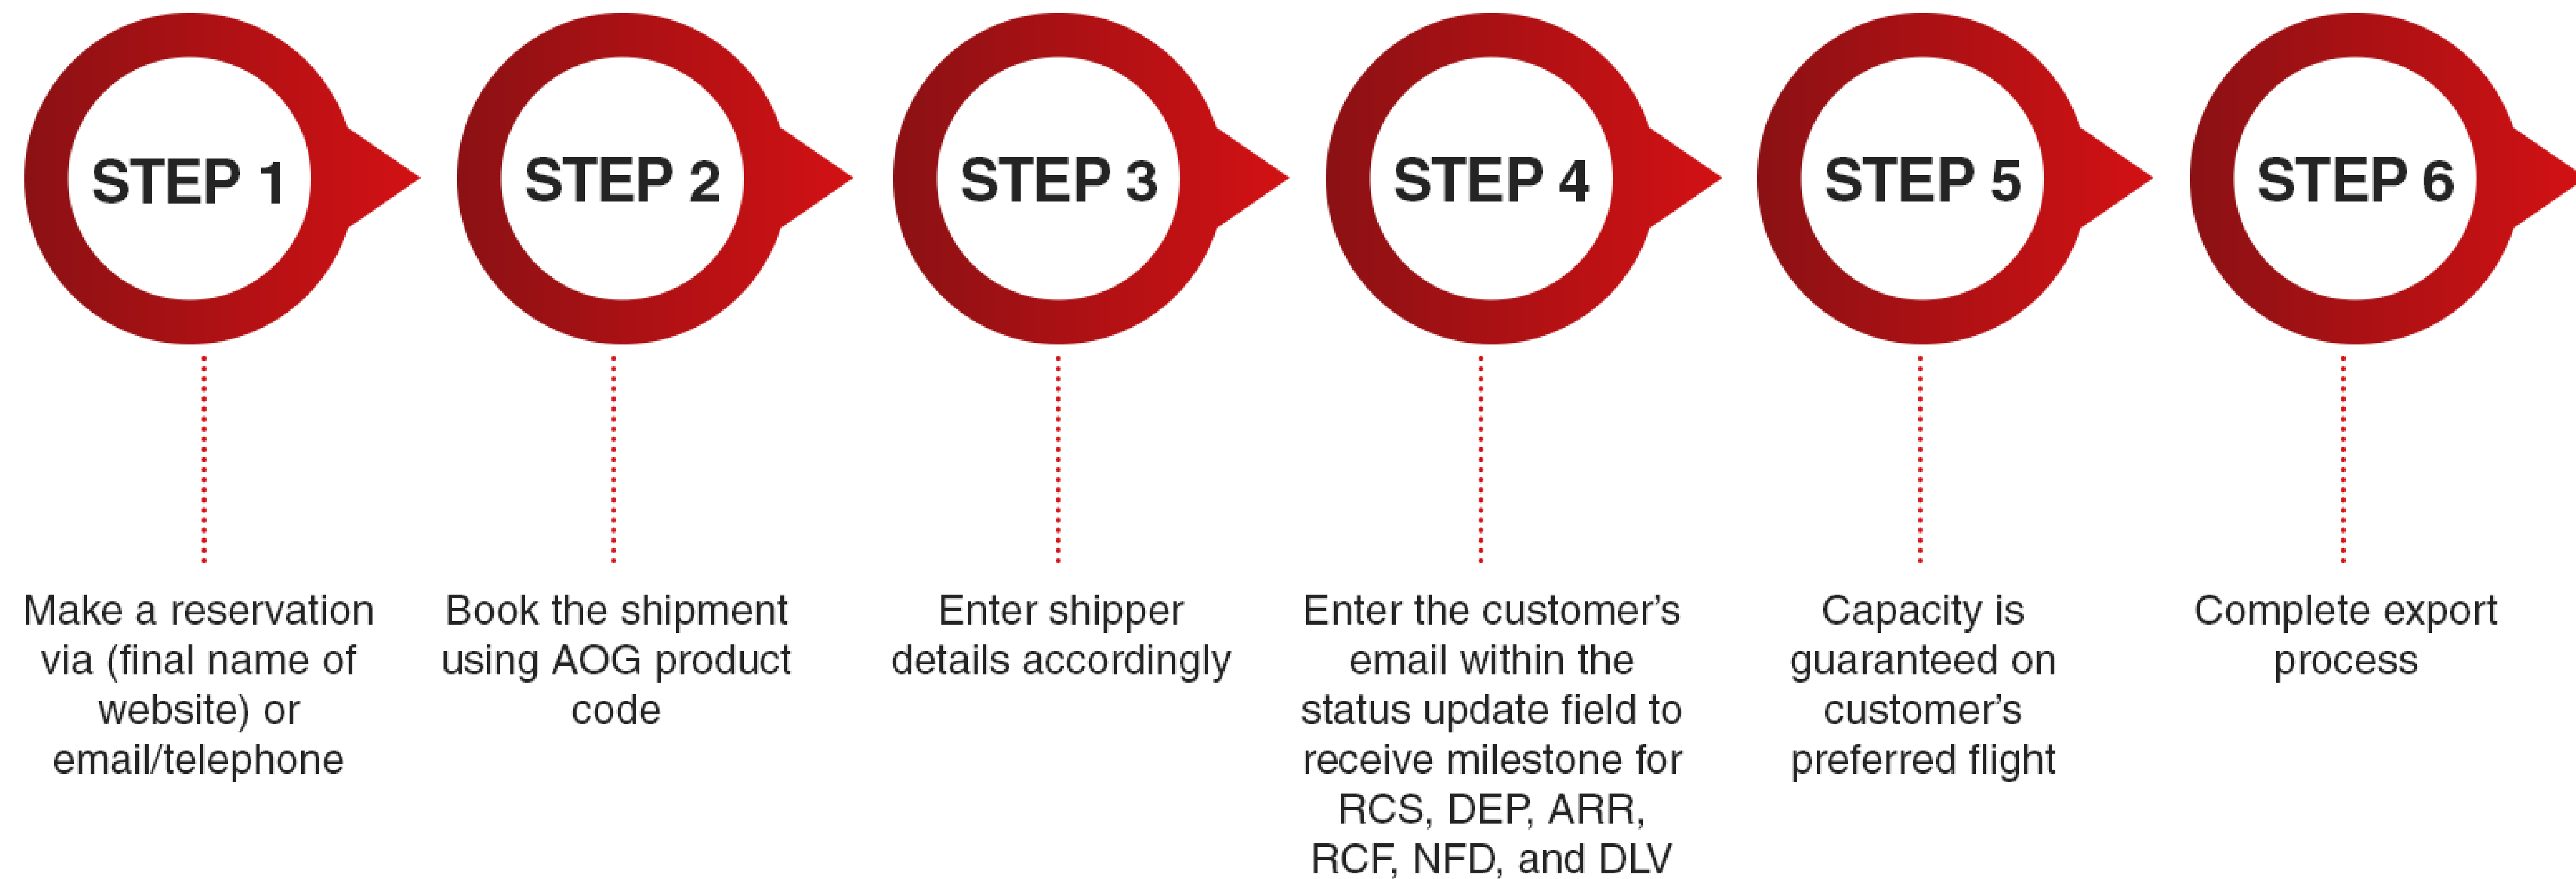

WHAT IS AGX AOG?

AGX Aircraft on Ground (AOG) is our air freight service for aircraft parts (0 to 100 kg weight break), aircraft engines, and other materials (up to 14,000 kg) through a reliable, prioritized, and expedited transport process.

AGX AOG Features

Booking Process

Points To Remember While Booking

1

PRODUCT AND SHC CODE

“AOG” Select code to ensure shipment as AOG. If code is not selected, the shipment will be incorrectly handled as general cargo.

2

AOG shipments, most especially dangerous goods (GD) or hazardous materials (HAZMAT), must comply with IATA DG regulations.

3

Ensure consignee's paperwork is in order to expedite delivery to the destination

Operation process

AOG shipments
are loaded either
in bulk or
high-priority
ULDs

Pre-alert is sent
to destination to
pledge expected
arrival

Shipment is
transported to
warehouse
within 90
minutes or less

Shipments 100 kg or
less will be delivered
within 2.5 hours or
less / 101-1000 kg
shipments are
available for collection
within 4 hours

How We Prioritize AOG Shipments

TOP PRIORITY stamps are imprinted in AOG shipments for faster handling. Highly-trained personnel are kept informed with distinctive AOG posters positioned across the network to reinforce the need for the urgent movement of time-critical aircraft parts and engines.

Freighter diversions

AGX Logistics has the capacity to divert freighter aircrafts to any offline points even in short notice.

Our charter division is capable of diverting scheduled operations to airports that require AOG to be flown in the shortest time— giving an efficient, quick and economical solution for the customer.

We have LoadMasters positioned across the globe ready to be deployed to assist with loading.
