## TRADE & CUSTOMS COMPLIANCE

Maurice Ward Group®

We serve as a single resource for all **full-service customs clearance needs**, from classification to clearance to post-entry services, all at very affordable rates. Serving:

**1** Complete customs clearance import, export, transit of shipments: air, ocean, road, train

**2** Customs clearance of commercial and non-commercial goods

**3** Direct/indirect representation

**4** Experience with all customs regimes

**5** Holder of customs guarantees of all customs regimes

**6** Holder of simplified procedures licenses: Authorized shipper / Authorized cnee / local customs clearance

**7** Electronic customs clearance Customs software Helios – allows interfaces to your IT system

**8** Centralized customs clearance Breaks the rule that customs declarations are filed to the customs office to whom the goods are submitted. This thus makes it possible in practice for documents to be submitted to one customs office and any hands-on inspections to be performed by another customs office.

**We file customs declarations of goods located in EU country 'A' to customs office in country 'B'**

## Bonded warehouse

Deferring VAT and Duty payment on imported goods until they are removed from the warehouse to another EU party. Re-export of goods outside of EU without payment of VAT and Duty.

## Benefits to customers

A reduction in the amount of data required to be submitted during customs clearance procedures, in the number of hands-on inspections, and the status of a credible partner in business transactions, **not only in the EU but in third countries.**
